

OSHSYS98 Changes from Prior Version

Documented below are the differences between OSHSYS Version 3.0 (“OSHSYS98”) and OSHSYS Version 2.0 from the prior year.

- The new accident year (1998, ending 30 June 1998) was added.
- Accident years 1997 and prior were updated with 12 months additional case reports and claim payments.
- The San Diego region was added.
- The platform was changed to Microsoft Access97.
- Messages were added to screens with no data.
- Regarding CD2 (the data-rich, program free CD):
 - Date fields were expanded to four digits.
 - The “date notice received” field was added.
 - A field capturing payments in the most recent year was added.
 - Code descriptors were expanded.
